SKILLS

Languages:	Java, Python, C++, SQL
Tools/Platforms:	Flask, FastAPI, React.js, Docker, Git, REST APIs, PostgreSQL, MySQL, Redis
Libraries:	NumPy, Pandas, Scikit-learn, Matplotlib, Seaborn
Core Skills:	Machine Learning, Data Structures & Algorithms, OOPs, DBMS, Operating Systems, Computer Networks, System Design, API Design, Cloud Computing
Soft Skills:	Consistency, Time Management, Adaptability, Resilience

PROJECTS

Multi Tenant Appointment Booking System <i>Python, Flask, PostgreSQL, JWT auth, Docker, Render</i> GitHub	Apr 2026
- Built a scalable multi-tenant appointment booking platform supporting multiple businesses with isolated data and secure user access - Designed and implemented RESTful APIs using Flask, incorporating JWT-based authentication for secure login, role-based access control, and session management. - Engineered a PostgreSQL database with efficient schema design to handle tenant separation, appointment scheduling, and concurrency management. - Containerized the application using Docker for seamless deployment, ensuring portability and consistency across environments. - Deployment link - Link	
Customer Segmentation Dashboard <i>Python, Scikit-learn, Streamlit</i> GitHub	Jan 2026
- Built an end-to-end customer segmentation system using KMeans and DBSCAN to identify distinct customer groups based on behavioral and demographic features. - Performed feature engineering (loyalty score, income-based features) and applied clustering evaluation techniques such as silhouette score and elbow method for optimal model selection. - Developed an interactive dashboard using Streamlit with visualizations including cluster distribution, scatter plots, and model comparison for clear business insights.	
Inventory Management System <i>Java, AWT, Swing, MySQL(JDBC)</i> GitHub	Jul 2023
- Developed a desktop-based inventory management system using Java AWT to automate stock tracking, sales processing, and billing operations. - Implemented core functionalities including product management (add/update/delete), real-time inventory monitoring, and low-stock handling. - Integrated MySQL database using JDBC for efficient data storage, retrieval, and transaction management. - Built role-based user access and basic reporting features to streamline operations and support data-driven decision-making.	

TRAININGS

Fifth Force (Training Institute) Link	Jun 2023 - Jul 2023
Core Java with Oracle	
- Gained hands-on experience in Core Java, including OOP concepts, exception handling, and JDBC for database connectivity - Designed and developed a desktop-based Inventory Management System using AWT and Swing for the user interface. - Implemented secure user authentication and authorization to manage system access. - Performed CRUD operations using MySQL to efficiently handle inventory data. - Integrated frontend (AWT/Swing) with backend (MySQL) using JDBC, ensuring smooth data flow and functionality.	

CERTIFICATES

Supervised Machine Learning Certificate Coursera Link	Apr 2026
Core Java with Oracle Certification Fifth Force Link	Jul 2023

EDUCATION

Lovely Professional University	Phagwara, Punjab
Masters of Technology	Aug 2025 – Present
Computer Science and Engineering; CGPA: 8.92	
Lovely Professional University	Phagwara, Punjab
Bachelors of Technology	Aug 2021– Jul 2025
Computer Science and Engineering; CGPA: 8.26	
D.A.V Public School	Kangra, Himachal Pradesh
Intermediate	Mar 2019 – May2020
PCM; Percentage: 95.4	
D.A.V Public School	Kangra, Himachal Pradesh
Matriculation	Mar 2017 – May 2018
Percentage: 90.33
